CRANE OPERATOR
SMARTON OPERATOR

#SMOP 2 DAYS | CALL FOR PRICING **HANDS-ON TRAINING**

GENERAL DESCRIPTION

This course provides comprehensive instruction on the safe and efficient operation of SMARTON overhead cranes. This training focuses on SMART features that enhance precision, safety, and productivity during lifting operations. Participants gain both classroom knowledge and hands-on experience to confidently operate SMARTON cranes.

Each participant will receive a course workbook that will serve as a valuable resource for future reference. The working knowledge participants will acquire from this course will significantly reduce downtime and the risk of serious injury to personnel caused by improper cane operation.

WHO SHOULD ATTEND

This course is designed for the operators of Konecranes Smart Crane products. As well as facility and production managers where those cranes can maximize your productivity, or anyone looking to gain further knowledge about Konecranes Smart features.
